, provide exacting, well-reasoned, and impartial guidance.” In a 2016 article at the Washington Post, “How a New Generation of Lawyers Are Raising the Bar,” Joan Williams, an ethics professor at the George Washington University Law School, wrote that students were driven by a “progressive disinterest in the law as a vehicle for conservative ideology,” and that “future lawyers’ willingness to question and challenge authority will continue to transform the profession.” But even if they do, the consequences for lawyers and the American legal system could be serious. To cite just one example, if a nonlawyer can be reimbursed for attorney’s fees from a client, might a plaintiff lawyer be able to do the same from the defendant? Do the rising numbers of lawyers who are unwilling to accept institutional authority and ethical boundaries represent a dangerous shift in the foundations of American society? The increase in lawyers has already placed a larger burden on the legal system, and may well erode the ethical and ethical safeguards that are supposed to protect people and ensure fairness in the American legal system. Moreover, there is reason to believe that lawyers have a much greater influence over the legal decisions made by nonlawyers than do others in society. That is because, according to a 2016 report from the American Bar Association, a lawyer who represents himself or herself “is vastly more likely to prevail and receive a favorable outcome than non-attorney clients.” In part, the report states that this is because “a lawyer has a certain amount of expertise, beyond the experience of a typical consumer.” For this reason, many cases brought by nonlawyers in recent years have been unsuccessful, and the number of frivolous suits brought by nonlawyers has ballooned. This means that the legal system suffers the consequences. For instance, since most nonlawyers lose their cases, “corporations and businesses increasingly have to pay more in legal fees and spend a tremendous amount of time and money dealing with unnecessary lawsuits.” Many lawyers have tried to warn about these developments. Brian Tamanaha, legal ethics professor at the University of Illinois College of Law, in The Wall Street Journal, warned that lawyers would “find themselves in an industry stripped of expertise,” and that “lawyers need to decide whether they want to play a role in shaping the law or changing the law.”

This will place an empty layer above the one you’re currently working on, as shown in Figure 2-7. You can then edit the new layer just like any other layer. **Figure 2-7** Creating a new layer. You can create many layers and then apply different effects to them to improve the way your image looks. Select the Layer menu and click the New Layer icon or press Ctrl+N (Cmd+N) to create a new layer. You can also name layers. For example, if you wanted to create a Layer called text, you would type **Layer: text** in the Name box. When you name layers, you must use only alphanumeric characters, periods (.), hyphens (-), and underscores (_). Spaces and parentheses () are not allowed. You can click the icon to the left of the name box to access the Layer and Layer Mask fly-out menus. ## Applying Effects to Layers Photoshop comes with many ways to customize the look of a layer by applying an effect.
